^Must be a wholesale client to purchase these bonds.

The beneficial ownership of the client's securities remains with the client, and are the client's assets, at all times.

This report and the yields and prices of the securities are provided by FIIG based upon available yields and prices sourced from leading market makers and data services as well as any available market information and feedback when market volume and turnover is low or not transparent as at the reporting date.

Yields and prices are indicative only and there is no guarantee as to their accuracy. The yields and prices for the securities are an estimate based on

the information available to FIIG as at the reporting date and do not necessarily represent the market price or a price at which FIIG or any other party will buy or

sell the securities and may change without notice. If no yield or security is provided for any security, this is because there is insufficient information available to FIIG to provide a yield or price for the security

The yields and prices will be impacted by transaction size, the issuer's financial circumstances, market and economic conditions and the supply and demand dynamics prevailing at the time the client's securities are bought and sold, amongst other things. The historical yield, price or performance of the securities is no guarantee of their future performance

The yields and prices are not an offer by FIIG to buy or sell the securities. Should the client wish to sell their securities prior to maturity, FIIG will use its best endeavours to assist the client to sell those securities.

However, FIIG does not make a market in the securities

the information available to FIIG as at the reporting date and do not necessarily represent the market price or a price at which FIIG or any other party will buy or

sell the securities and may change without notice. If no yield or security is provided for any security, this is because there is insufficient information available to FIIG to provide a yield or price for the security

The yields and prices will be impacted by transaction size, the issuer's financial circumstances, market and economic conditions and the supply and demand dynamics prevailing at the time the client's securities are bought and sold, amongst other things. The historical yield, price or performance of the securities is no guarantee of their future performance

The yields and prices are not an offer by FIIG to buy or sell the securities. Should the client wish to sell their securities prior to maturity, FIIG will use its best endeavours to assist the client to sell those securities.

However, FIIG does not make a market in the securities
